2015	iCARE Award – VTE Team
2015	Stony Brook Medicine's Distinguished Community Service Award
2/2015	27 th annual meeting of the American Venous Forum Palm Springs, California, February 27, 2015 Prospective long term comparison of anticoagulation treatment versus thrombolysis in patients with acute ilio-femoral thrombosis. Travelling award for the best scientific presentation
2/2014	26 th annual meeting of the American Venous Forum New Orleans, Louisiana, February 22, 2014 The Natural History and Treatment Outcomes of Symptomatic Ovarian Vein Thrombosis. Travelling award for the best scientific presentation
3/2013	25 th annual meeting of the American Venous Forum Phoenix, Arizona, March 2, 2013 The role of ultrasound in the pelvic congestion syndrome workup. First prize for the best scientific presentation

certification for the operating room with first attempt and no citations. Currently have outperformed first year projected volume.

2008-present

Director, Venous Thromboembolism Team

Developed a VTE team in 2008 to implement and EMR VTE advisor based on ACCP guidelines. This has expanded to multiple achievements including reduction in use in Argatroban, improvement in VTE risk factor evaluation, improvement in VTE prophylaxis, reduction in LOS and reduction in VTE events. Resulting in significant cost savings for the institution. Some of the highlights are listed below:

- 2015 – VTE team received iCARE award
- 2015 – Improvement in overall VTE core measure from 35% to 92%
- 2013 – Implemented IVC filter retrieval program which has reduced usage of IVC filters by 50% and has improved retrieval from 20% to 80%. This results in significant savings and improved patient quality. **Annual savings: \$100K**
- 2012 – VTE team evaluated intermittent compression devices in the market and played a key role in selecting the best device in the market at the lowest cost. **Annual savings: \$75K**
- 2011 – Implemented floor service with NP's to help expedite patients with VTE for discharge. Worked with nursing and social services to anticipate patients needs on discharge. **Annual savings: Decrease LOS of patient with DVT by 1.3 days.**
- 2010 - Stony Brook was in **Top ten percent** of all applications submitted to the Hospital Association of New York State (HANSYS) for the **Pinnacle Award for Quality and Patient Safety** in Deep Vein Thrombosis (DVT) effort to improve assessment rates and outcome.
- 2009 – Implemented protocol for Argatroban use which resulted in significant cost savings. This program is still in effect and has continued the above annual savings. **Annual savings: \$500K**

2010-present

Supervisor, Bedside PICC team

In 2010 we transitioned from fluoroscopy guided PICC placement in Special procedures to bedside placement. This has not only dramatically improved time to placement but also reduced hospital LOS and decreased overall costs.

- 2015-2016 – Incorporated new technology to eliminate need for portable CXR to confirm PICC placement. **Anticipated net annual cost savings: \$100K**
- 2013-2015 – developed standardized protocol for PICC placement. **Institution benefit: 0% incidence of catheter related infections** due to PICC lines in the last 2 years.
- 2011 – Transitioned over 90% of PICC lines now performed at bedside. **Institutional benefits: decrease in LOS in PICC patients by 2.5 days.**

2007-present

Director, Center for Vein Care

The Center for Vein Care is world renowned in research, cutting edge therapy, and patient care. National and international presentations on clinical research. Patients come for treatment from all over the United States. Was the first IAC Accredited Vein Center on Long Island and the third in New York State.

- The most clinically/financially productive service in the Department over the last several years.
- Visiting physicians from around the world come for training.
- Individually – the highest earner in the Department of Surgery with annual revenue over \$2million the last 2 years.

2003-present

Medical Director Inpatient/Outpatient Vascular Lab

The Vascular lab has seen dramatic growth over the past decade both in the inpatient and outpatient settings. We have maintained ICAVL accreditation over the years with no citations. We have expanded the service from 5 days a week from 8-4, to 7-days a week from 7:30-midnight.
